

Erasmus+ Creditmobility experience

My Erasmus+ in Budapest was one of the best experiences in my life. Budapest is a lovely and cosy city, with its castle rising over the city and the river running through the city centre. Hungary itself is a wonderful country, with breath taking landscapes.

The Keleti faculty is located in the city centre, a perfect location. It's very well organized, I haven't experienced any difficulties regarding my classes nor regarding something else. I improved my English and added Hungarian words into my vocabulary. I liked the way the classes have been given, in small groups. That gave the opportunity to get to know my fellow students well. During that wonderful four months I survived many many amazing things, I met a lot of great

people from the whole Europe. As I am the first Erasmus student who came from my contry to Keleti Faculty I will definitely recommend it to other students from Serbia. My time in Budapest changed my view on very different aspects of life, broadening my horizon. I realized the world is much bigger than the one I used to know before I left on Erasmus. I learned how to handle situations which aren't easy on my own and became more mature and independent. Most important of all, I discovered myself, partly thanks to the people I met, whom I'll never forget.
