Quality assurance method:	
	Developed competencies
	Knowledge of the basic and comprehensive concepts, theories, facts, and national economy and international implications of economic science, as well as relevant economic players, functions and processes.
	Knowledge and understanding of the basic principles and methods of business process control, organization and operation, the methodology of business process analysis, as well as the methodological basics of decision preparation and decision making support.
	Knowledge of the basics of other special fields (technical, legal, environment protection, quality assurance, etc.) as related to their special field.
	Mastered the written and verbal forms of professional and efficient communication, the tabular and graphic methods of presenting data.
	Apply the theories and methods learnt to explore, systematize and analyze facts and fundamental correlations; draw conclusions, make critical remarks independently; produce proposals to prepare decisions; make decisions both in a routine and in a partially unknown environment, both domestically and abroad.
	Follow and interpret global economic and international business processes, changes in economic policy, in special policies and legal regulations relevant to the special field, together with their implications, and take them into consideration in analyses, proposals, and decisions.
	Able to identify the complex consequences of economic processes and organizational events.
	Present professional proposals and standpoints adequately formulated from the conceptual and theoretical points of view, verbally and in writing, in Hungarian and in a foreign language, in compliance with the rules of professional communication.
	Responsive to new information, new professional skills and methodologies; open to new, individual and collaborative tasks and responsibilities. Efforts to develop their knowledge and work relations, and to cooperate with colleagues in this.
	Receptive to others' opinions, to industrial, regional, national and European values (including aspects of society, welfare, ecology, and sustainability as well).
	Endeavoring for lifelong learning both within and outside the realm of work.
	Taking responsibility for analyses, conclusions and decisions.
	Individually managing, organizing and controlling an organizational unit within a business entity, a working team, a venture, a small-sized business entity, taking responsibility for staff and organization.
	Delivering presentations, chairing discussions individually. Participating independently and responsibly in the work of professional forums both within and outside the business entity.
