

Brief report

My name is Francisco Javier Flores Gatica graduate student from the PhD material's engineering program at Universidad Autónoma de Nuevo León (UANL). While studying my master's degree I got the opportunity of a broad experience at the Obuda University for spring term 2017. With Dr. Imre Felde accepting me as his student and helped by the Erasmus+ grant I didn't give second thoughts to take this chance and give myself what became an amazing enrichment foreign experience. During my period at the university I focused on the assessment of the experimental data gathered through tests of what was my thesis's project back then. With the help of Dr. Imre Felde we develop a working plan for my staying that would let me evaluate these data performing a finite element analysis aid by a commercial software. I started to familiarize on the basics of how to model and simulate with raw results at first. At the same time while working these data I could worked out my communication skills by giving lectures on what was my work.

This opportunity was my first time traveling to Europe thus at first, I felt excited and aware of the upcoming challenges. Even though I spent most of my time working, I manage myself to find some time to know the city like getting a tour over the river, visiting the Parliament, walking to Gellert hill which gave one of the most amazing views. As well as touring the city, I did some quick travels outside Budapest, getting to meet Venice, Croatia and France. It is worth saying that all this was possible thanks to Erasmus+ grant which I'm very pleased. I could not be more satisfied from the city and its people, I found myself very comfortable during my living there. I enjoyed every single day for that it was difficult finishing my time over there. For last, I could say this is a great experience for anyone who is willing to take challenges for meeting new people, new places but more over to increase both professional and personal growth, If I have the opportunity again to take the rant I will return no doubt.

M. Sc. Francisco Javier Flores Gatica
